

L2 Finding Patterns & Repetition Around You

Our world is filled with patterns. They are everywhere when you start looking for them...on buildings, on walls, on ceilings, on the ground, in nature, in food, and on fabrics!

Instructions:

- 1) Take 5 photographs of patterns & repetition around college. Use your mobile phone or a digital camera. Take close-ups if you need to and be creative with your shots!
- 2) Upload your photographs to your Induction Homepage.
- 3) By each photograph write a short paragraph on the following:
 - Describe what is in the photograph
 - Describe the patterns (are they geometric/organic/decorative/symbolic?)
 - Explain how the repetition in each photograph influences the overall composition/look of the photo? (the rhythm/balance/unity/movement/emphasis)
 - What mood and meaning are created through the use of repetition in each photograph? How does it make you feel?
